

## Volume Contents

### Volume 82 (1996)

#### Regular papers

- Characterization of a small variable surface glycoprotein from *Trypanosoma vivax***  
P.R. Gardiner, V. Nene, M.M. Barry, R. Thatthi, B. Burleigh, M.W. Clarke (Kenya, Canada) 1
- A role for erythrocyte band 3 degradation by the parasite gp76 serine protease in the formation of the parasitophorous vacuole during invasion of erythrocytes by *Plasmodium falciparum***  
E. Roggwiler, M.E.M. Bétoulle, T. Blisnick, C.B. Breton (France) 13
- Disruption of a novel open reading frame of *Plasmodium falciparum* chromosome 9 by subtelomeric and internal deletions can lead to loss or maintenance of cytoadherence**  
P.F. Bourke, D.C. Holt, C.J. Sutherland, D.J. Kemp (Australia) 25
- Plasmodium falciparum* protein kinase 5 and the malarial nuclear division cycles**  
R. Graeser, B. Wernli, R.M. Franklin, B. Kappes (Switzerland) 37
- Carboxy-terminal sequence divergence and processing of the polyprotein antigen from *Dirofilaria immitis***  
C.B. Poole, L.J. Hornstra, J. S. Benner, J.R. Fink, L.A. McReynolds (USA) 51
- Characterisation of protein isoprenylation in procyclic form *Trypanosoma brucei***  
H. Field, I. Blench, S. Croft, M.C. Field (UK) 67
- Characterization of ubiquitin genes and -transcripts and demonstration of a ubiquitin-conjugating system in *Entamoeba histolytica***  
C. Wöstmann, D. Liakopoulos, A. Ciechanover, Tilly Bakker-Grunwald (Germany, Israel) 81
- High molecular mass agarose matrix supports growth of bloodstream forms of pleomorphic *Trypanosoma brucei* strains in axenic culture**  
E. Vassella, M. Boshart (Germany) 91

#### Short communications

- Identification of 2-enoyl coenzyme A hydratase and NADP<sup>+</sup>-dependent 3-hydroxyacyl-CoA dehydrogenase activity in glycosomes of procyclic *Trypanosoma brucei***  
E.A.C. Wiemer, L. IJlst, J. van Roy, R.J.A. Wanders, F.R. Opperdoes (Belgium, The Netherlands) 107
- Sequence and immunogenicity of *Taenia saginata* ferritin**  
L. Benitez, L.J.S. Harrison, R.M.E. Parkhouse, T. Garate (Spain, UK) 113
- Cloning of a ribosomal phosphoprotein P0 gene homologue from *Plasmodium falciparum***  
A. Goswami, S. Chatterjee, S. Sharma (India) 117
- Transkinetoplastidy in arsenite-resistant *Leishmania major***  
S.C. Chiang, J.C. Yu, S.T. Lee (Taiwan, ROC) 121
- Inhibition of *Trypanosoma cruzi* and *T. brucei* NADH fumarate reductase by benzimidazole and anthelmintic imidazole derivatives**  
J.F. Turrens, B.P. Watts Jr., L. Zhong, R. Docampo (USA) 125
- Heterogeneous transcripts of RIME/ingi retroposons in *Trypanosoma brucei* are unspliced**  
E. Vassella, I. Roditi, R. Braun (Switzerland) 131

#### Instructions to authors

## Regular papers

<b>Characterisation of the novel junctions of two minichromosomes of <i>Leishmania major</i></b> G. Ortiz, M. Segovia (Spain)	137
<b>Sequence of a malic enzyme gene of <i>Giardia lamblia</i></b> L.B. Sánchez, T. Hashimoto, M. Müller (USA)	145
<b>Gene cloning and cellular localization of a membrane-bound acid phosphatase of <i>Leishmania mexicana</i></b> M. Wiese, O. Berger, Y.-D. Stierhof, M. Wolfram, M. Fuchs, P. Overath (Germany)	153
<b>A peptide derived from a B cell epitope of <i>Plasmodium falciparum</i> rhoptry associated protein 2 specifically raises antibodies to rhoptry associated protein 1</b> A.W. Stowers, J.A. Cooper, T. Ehrhardt, A. Saul (Australia)	167
<b>Photoaffinity labeling of mefloquine-binding proteins in human serum, uninfected erythrocytes and <i>Plasmodium falciparum</i>-infected erythrocytes</b> J. Desneves, G. Thorn, A. Berman, D. Galatis, N. La Greca, J. Sinding, M. Foley, L.W. Deady, A.F. Cowman, L. Tilley (Australia, Denmark)	181
<b>Glucose uptake in <i>Plasmodium falciparum</i>-infected erythrocytes is an equilibrative not an active process</b> K. Kirk, H.A. Horner, J. Kirk (UK, Australia)	195
<b>Physical and functional mapping of the transcriptional start sites of <i>Plasmodium falciparum</i> proliferating cell nuclear antigen</b> P. Horrocks, B.J. Kilbey (Germany, UK)	207
<b>Rhodoquinone is synthesized de novo by <i>Fasciola hepatica</i></b> J.J. Van Hellemond, M. Luitjen, F.M. Flesch, C.P.H. Gaasenbeek, A.G.M. Tielens (The Netherlands)	217
<b>Differential expression of <i>Leishmania major</i> <math>\beta</math>-tubulin genes during the acquisition of promastigote infectivity</b> R.M.R. Coulson, V. Connor, J.C. Chen, J.W. Ajioka (UK)	227
<b>Molecular cloning of the <i>Toxoplasma gondii</i> sag4 gene encoding an 18 kDa bradyzoite specific surface protein</b> C. Ödberg-Ferragut, M. Soète, A. Engels, B. Samyn, A. Loyens, J. Van Beeumen, D. Camus, J.-F. Dubremetz (France, Belgium)	237
<b>Characterization of the <i>Trypanosoma brucei</i> homologue of a <i>Trypanosoma cruzi</i> flagellum-adhesion glycoprotein</b> T. Nozaki, P.A. Haynes, G.A.M. Cross (USA)	245

## Short communications

<b>Overexpression of P-glycoprotein gene 1 by transfected <i>Entamoeba histolytica</i> confers emetine-resistance</b> S.K. Ghosh, A. Lohia, A. Kumar, J. Samuelson (USA, India)	257
<b>Heat-labile and heat-stimulable heme polymerase activities in <i>Plasmodium berghei</i></b> C.D. Fitch, A.C. Chou (USA)	261
<b>Cloning and characterisation of strain-specific transcripts encoding triosephosphate isomerase, a candidate vaccine antigen from <i>Schistosoma japonicum</i></b> C. William Hooker, P.J. Brindley (Australia)	265
